NATIONAL CRANE NBT30H-2

More Reach—8% more boom than the competition. Hit more picks without swinging a jib.

Stronger—13% more capacity means fewer picks to get the job done faster.

Adaptable—Multiple position outriggers allow you to set up more safely on tight jobsites.

Load Sense Pump draws oil only when needed. This reduces heat and produces less strain on the engine and saves on fuel.

Greater Job Site Flexibility—38° more rotation creates fewer dead spots.

Safer—36" operator's platform without a bulky, obtrusive pedestal for greater job site visibility.
